Methodology and Background

Instrument Design and Timeline

From April 18–May 2, 2016, the American University of Armenia (AUA) administered its 2016 Sophomore Student Exit Survey. The survey was carried out by the university's Institutional Research Office (IRO) with the support of the Provost and the academic programs.

The objectives of the survey were to gather information from sophomore students about their second year experience, academic environment, extracurricular activities, satisfaction with services provided at the university, expectations for upcoming academic year, as well as to identify areas of possible improvements.

This report describes the methodology used for the survey and presents the findings in tables.

Sample, Procedures, Response Rate

The survey population included 388 sophomore students:

- 190 students from the Bachelor of Arts in Business (BAB) program,
- 63 students from the Bachelor of Science in Computational Sciences (BS CS) program,
- 87 students from the Bachelor of Arts in English and Communications (BA EC) program.

An email was sent from the Provost on April 18 highlighting the importance of the survey, requesting participation and providing direct link to on-line survey.

In seeking a high response rate, the following course of action was taken:

- Two reminder emails were sent from the IRO on April 26 and May 2.
- Reminder fliers were posted around campus (academic program offices, cafeteria, student lounge, lobbies).
- Deans, Program Chairs, the Center for Student Success and the Office of the Registrar were asked to promote participation.

A total of 218 (64.1%) out of 340 sophomore students participated in the survey. The results of 36 partially completed surveys were excluded in the analyses, thus denoting **a response rate of 53.5%**.

Upon completion of the on-line survey, data were generated through SPSS, and statistical analyses such as frequencies, cross-tabulations, and mean of the responses were performed.
